

Saroj Kumar Tharu

Full Stack Engineer

sarojc11345@gmail.com | +977-9864919866 | Sanepa, Nepal | Portfolio | Github | LinkedIn

PROFILE

Full Stack Engineer with proven experience in the design and development of scalable backend architectures. Adept at leveraging modern tools and technologies-including async microservices, Docker, Kubernetes (k8s), and Jenkins-to build robust CI/CD pipelines that ensure exceptional performance and code quality for web applications.

EXPERIENCE

FULL STACK ENGINEER (INTER), MYPAY

07/2025 – Present

Radhe Radhe,
Bhaktapur

- Engineered a live stream feature by integrating YouTube's API with the backend, focusing on the design of a cost-effective and high-performance architecture using Node.js, EJS, and Tailwind CSS.
- Contributed to e-commerce application development by designing a robust, role-based access control architecture, boosting system security and user experience engagement by 35%.

SOFTWARE ENGINEER, Freelancer

01/2024 – Present

Remote

- Delivered over 20 high-performance full-stack applications, prioritizing exceptional code quality and earning consistent 5-star client reviews.
- Formulated the end-to-end design and architecture of cloud-native applications, creating a CI/CD factory for seamless deployment from development to production (Jenkins, Docker, Kubernetes, AWS).

FULL STACK ENGINEER, QBITZONE

07/2024 – 02/2025

Gusingal, Kupondole

- Constructed a full-stack expense application (React, Node.js, MySQL), establishing a CI/CD factory that streamlined machine learning data capture and improved data pipeline efficiency by 30%.
- Spearheaded the end-to-end development of a high-performance data analysis tool, engineering a solution with React and Node.js that accelerated processing speeds by 40% for the healthcare sector.
- Optimized web portal architecture and performance using Next.js, reducing deployment times by 50% through a streamlined Jenkins CI/CD process.

SKILLS

Technical Tools

Frontend & UI Libraries

React.js, Next.js, Angular, Tailwind CSS, Ant Design, Daisy UI, Framer Motion

Backend & Databases

Node.js, Express.js, MongoDB, MySQL, PostgreSQL, Redis, RabbitMQ, NoSQL

Cloud & DevOps

Docker, Kubernetes (K8s), AWS (EC2, S3, Security Groups), Linux, Nginx ,CI/CD, Jenkins, Git/GitHub

PROJECTS

MarketMandu (E-commerce),

Angular, Node.js, Express.js, MongoDB, MySQL, AWS(S3, EC2), Docker, K8S, Jenkins, Nginx

- Built a highly secure e-commerce application, implementing customized role-based access control (Admin/Customer) to strengthen the overall security architecture.
- Directed the development of a high-performance backend, designing scalable APIs to streamline the product management and checkout process for an optimal user experience.
- Orchestrated the platform on Kubernetes (k8s) and established a CI/CD factory (Jenkins), ensuring seamless deployments, high code quality, and resilient performance under heavy traffic.

Surakshya Cloud, *Node.js, Express.js, Tailwind, EJS, DaisyUI, AWS(S3, EC2)*

- Created a scalable cloud storage application integrating AWS S3, deploying the high-performance backend on Kubernetes (k8s) to ensure reliable data management.
- Modernized the deployment process by building a CI/CD factory (Jenkins, Docker), integrating Trivy vulnerability scanning to guarantee top-tier code quality.
- Elevated the user experience by designing a responsive web interface, implementing intuitive collaborative sharing controls to optimize the file organization process.

Movie Booking App, *Node.js, MySQL, MongoDB, Docker, RabbitMQ, Sequelize, Mongoose, SQL, NOSQL*

- Structured robust security workflows and ORM-based data management, streamlining the digital receipt process across a hybrid SQL/NoSQL (microservice) architecture.
- Mapped event-driven backend communication between Auth, Payment, and Reminder services using RabbitMQ, ensuring high-performance message processing and a reliable Docker deployment factory.
- Managed the development of a microservices application by designing RESTful APIs and integrating major payment gateways, reducing missed bookings by 25% via RabbitMQ-powered reminders.

College Mangement System (CMS),

Node.js, Express.js, MongoDB, Mongoose, Tailwind, Cloudinary, Docker, Kubernetes, Jenkins, Nginx

- Designed a robust College Management application, establishing a high-performance backend architecture with structured access control to elevate system security.
- Modernized the deployment process by building a CI/CD factory (Jenkins, Docker), integrating Trivy vulnerability scanning to guarantee top-tier code quality.
- Deployed a highly resilient infrastructure on a Kubernetes (k8s) cluster, optimizing the design with an Nginx Ingress Controller to ensure a flawless user experience during peak traffic.

EDUCATION

Bachelor of Engineering in Information Technology, *Everest Engineering College*

2021 – Present

Affiliated with Pokhara University

Sanepa, Nepal

Intermediate (+2) in Science, *BVM Secondary School*

2018 – 2020

Kohalpur-15, Nepal
